

ECOWRAP

ECOWRAP is a semi-automatic machine with rotating arm ideal for wrapping with stretch film products particularly unstable, the chance 'to keep the pallet stop and stabilize the product by turning a rotating arm. This machine is the right solution for environments logistics.

TECHNICAL SPECIFICATIONS

ECOWRAP Rotating Arm Stretch Wrapping Machine	
Carriages	FRD:Film stretch with mechanical brake
Machine Characteristics	
Arm rotation speed	7÷11 rpm
Upward/downward carriage speed	2,6 ÷ 6 m/min
Power supply voltage	230 Volt 1 Ph - 50/60 Hz
Installed power	1,9 kW
Productivity	30 pallets/h
Max load weight	Unlimited

Characteristics of the product to be wrapped	
Maximum dimensions (LxW):	1000 x 1200 mm
Maximum useful height:	2200 mm

Film spool characteristics	
Max. external diameter (D):	250 mm
Film spool height (h):	500 mm
Film thickness:	9-35 µm
Internal diameter (d):	76 mm with and without core
Max. weight:	6 kg
