

AIR VOID FILL BAGS

**Biodegradable Air Bags
First in India**

As a leader in air cushion packaging, our ranges of packaging systems have been designed to ensure high levels of product protection through its transit and storage life cycle. AIR Void Filling System air pillows provide a durable block and brace product and a reliable cushioning material for light to medium weight products. The lightweight properties of the air pillows reduce shipping costs and because the air cushions are produced on demand they require minimal storage space.

Our ranges of void fill machines have been engineered to work for prolonged periods of time at high speeds and are amongst the most reliable in the industry. The AIR Void fill portfolio consists of three different packaging systems enabling us to offer you a tailor made solution to improve your packaging process and deliver our working comfort ethos.
