

PALLETISER

We are specialized in palletizing with the target to offer our customers suitable palletizing solution.

FEATURES

- Robust-and material efficient design
- Low energy and maintenance cost
- High quality components
- Simple and fast installation and start-up
- System options are easy to add – if required at a later stage (pallet dispenser, pallet roller conveyor and layer sheet application)
- Left or right infeed, easy to change.

PERFECT AND ACCURATE

- precise loaded pallets – due to mechanical layer squaring
- exact positioning of pallet load on pallet

SAFE & CLEAN

- design in U-shape-profiles (no box sections)
- palletizer highly visible from outside

LAYOUT

SIMPLE

- easy to operate and to maintain
- robust and durable

ECONOMICAL

- average consumption 0,9 kw/h (a comparable palletizing robot needs up to 4,5 kw/h)

FLEXIBLE

- handling of wide range of products (trays, cartons, shrink wrapped trays, trays with lid, ...)
- fast- and easy product change (max. 2 min.)
